

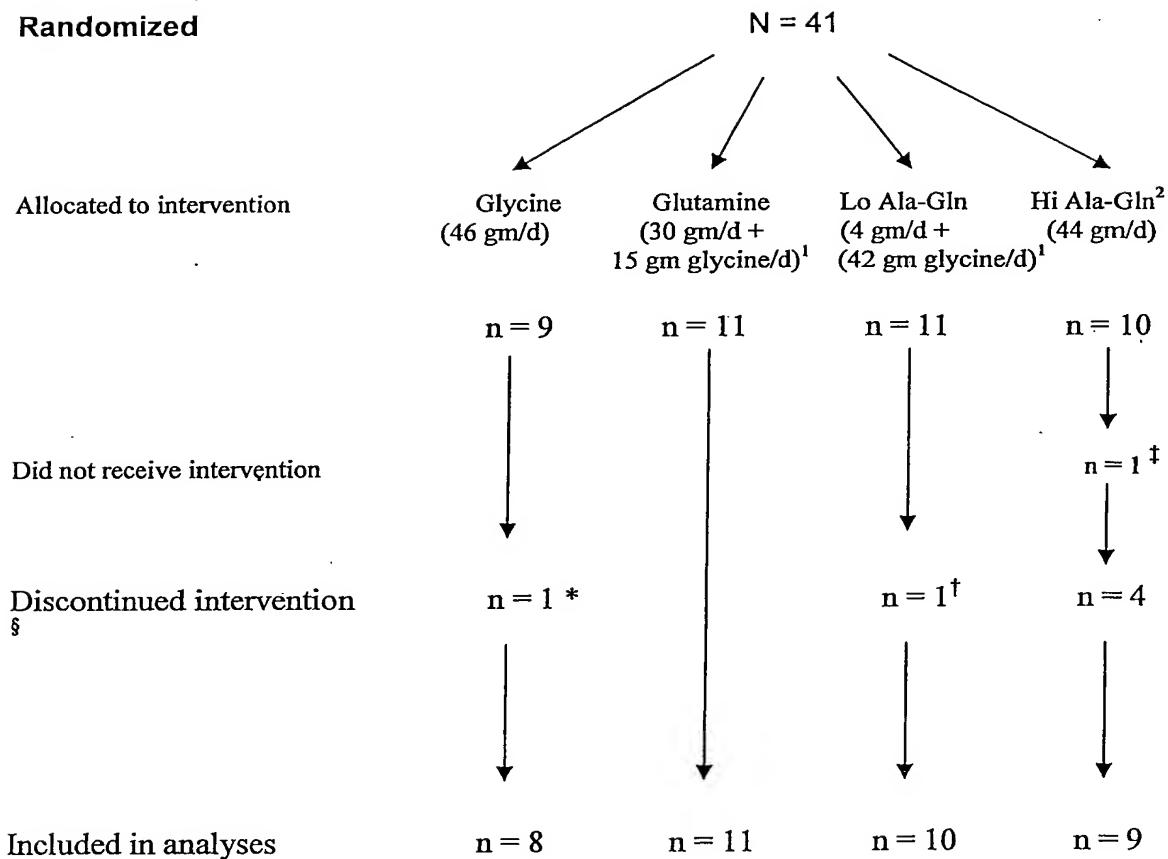

Fig. 1

* Did not tolerate study drug: nausea and vomiting.

† Patient died of apparent pulmonary embolism within two days of starting study drug.

‡ Refused blood draws.

§ Four patients discharged early improved before study was completed.

¹ Glycine was added to Gln and Ala-Gln to equalize the amount of Nitrogen given.

² High Ala-Gln dose was calculated to be equi-molar to glutamine of 30 gm/d.

Fig. 2

Clinical

Score	-2	-1	0	+1	+2	+3
Glycine	oo	oo	o	o	oo	
(n=8)	x	xxx	x	x	x	x
Glutamine			ooooo	ooo	ooo	
(n=11)				xxxx	xxxxx	x
	x					
AlaGln-4	oo	ooooo	oo	o		
(n=10)		xxx	xxxxx	xx		
AlaGln-44	o	o	ooo			
(n=9)*	x	x	x	xx		

• Including 4 patients who left on days 3 to 5 because they improved.
